Assuming responsibility for its present and long-term impacts on people and the environment, Nouveau Monde Graphite (NYSE: NMG, TSX.V: NOU) is an integrated graphite company with a promise of responsible mining, environmentally friendly production, traceability, and carbon neutrality.

NMG’s business model is aligned with global decarbonization efforts, supplying the EV value chain and the clean energy transition.

**POSITIVE SENSITIVITY TO CLIMATE OPPORTUNITIES**

- Graphite is fundamental to lithium-ion batteries and certain fuel cell technologies that enable the adoption of clean energies.
- NMG’s responsible mining and manufacturing are set to generate battery material with a carbon footprint of 1.23 kg CO2-eq per kg of CSPG, an impact up to 11 times smaller than that of benchmarked production.
- Already carbon neutral, NMG intends to reach Net Zero by 2030 through various GHG reduction initiatives and offset projects. By 2030, 50% of all unabated emissions are targeted to be compensated through company-owned local sequestration projects, reducing financial exposure to carbon offset markets.
- Projected to be the world’s first all-electric open pit mine via partnership with Caterpillar to deploy zero-emission fleet by year 5 of Phase 2 of the Matawinie Mine.
- Gradual implementation of TCFD recommendations to strengthen our climate disclosure.

**NMG’S PROJECTED INTEGRATED CARBON PROFILE**

Dry-stacking and co-disposal of tailings to prevent acid drainage and environmental liabilities

Results from NMG test cells validate the innovative tailing management approach developed on best practice requirements by the Toward Sustainable Mining Standard, the Global Industry Standard on Tailings Management, and the International Network for Acid Prevention.

**Responsible water management**

Water management system developed around reuse, quality treatment and controlled return to the final effluent:

- 96% of water volumes required for ore concentration leveraged through closed loop
- 100% of water managed on site and released to the environment complied with quality criteria

**Progressive restoration throughout operations**

Backfilling of the pit as early as Year 6 of production to minimize the mine’s environmental footprint.

**Demonstrated innovation capacity**

Proprietary thermochemical purification process, free of harmful chemicals such as hydrofluoric acid.

Investment in R&D to develop the next generation of green materials.

Fostering synergies with other industries in line with the circular economy approach.

Active contributor to the Global Battery Alliance’s Battery Passport to support environmental and social compliance through the battery value-chain.

**Supporting opportunities for Indigenous peoples and businesses**

Respect of the rights, culture, and traditional knowledge of Indigenous Peoples and commitment to build mutually beneficial relationships.

Framework Agreement (2018) and a Pre-Development Agreement (2019) signed with the Atikamekw First Nation; on-going discussions towards an Impact and Benefit Agreement.

Initiatives and mechanisms supporting training, employment and business opportunities:

- 2% of employees self-identify as Indigenous
- 1.8% of suppliers are Indigenous-owned and/or reported actively hiring Indigenous workers.

**Partnered development with local communities**
NMG ESG journey relies on continuous stakeholder engagement and constant monitoring of ESG impacts, risks, and opportunities using recognized sustainability and reporting frameworks.

ESTABLISHED ESG GOVERNANCE

Accountability

- **A2 sustainability rating** by Moody’s ESG Solutions, second-highest grade on the Sustainability Rating scale
- Continuous mapping of short-, medium- and long-term ESG risks and opportunities
- Annual performance disclosure through NMG’s ESG Report and CDP
- ESG strategy integration from Board to operational floor
- Development of data management strategy for core ESG KPIs, ensuring quality data for investors
- Timely monitoring of sustainability trends and upcoming ESG-related regulations

NMG’S COMMITMENTS TO SUSTAINABILITY ARE SUPPORTED BY TARGETS

AIMING TO INTEGRATE ESG-LEADING PRACTICES AHEAD OF FULL-SCALE COMMERCIAL PHASE

ESG data reflects 2022 reporting period unless otherwise stated.

All statements, other than statements of historical fact, contained in this fact sheet constitute “forward-looking information” or “forward-looking statements” within the meaning of certain securities laws, and are based on expectations, estimates and projections as of the time of this fact sheet. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by the Company as of the time of such statements, are inherently subject to significant business, economic and competitive uncertainties and contingencies. These estimates and assumptions may prove to be incorrect. Moreover, these forward-looking statements were based upon various underlying factors and assumptions, including the timely delivery and installation of the equipment supporting the production, the Company’s business prospects and opportunities and estimates of the operational performance of the equipment, and are not guarantees of future performance. Many of these uncertainties and contingencies can directly or indirectly affect, and could cause, actual results to differ materially from those expressed or implied in any forward-looking statements. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Forward-looking statements are provided for the purpose of providing information about management’s expectations and plans relating to the future. The Company disclaims any intention or obligation to update or revise any forward-looking statements to explain any material difference between subsequent actual events and such forward-looking statements, except to the extent required by applicable law. A further description of risks and uncertainties can be found in NMG’s Annual Information Form dated March 23, 2023, including in the sections thereof captioned “Risk Factors”, which is available on SEDAR at www.sedar.com and on EDGAR www.sec.gov. Unpredictable or unknown factors not discussed in this Cautionary Disclaimer could also have material adverse effects on forward-looking statements.
